Fleet management

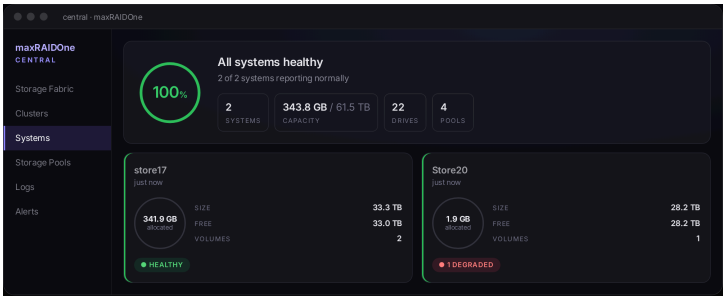

maxRAIDOne Central

Every system. A single pane of glass.

WHY IT'S DIFFERENT

Every maxRAIDOne system, in every site, in one view — without reconfiguring a single firewall.

Beta Q4 2026 · general availability Q1 2027

What you get

All systems. One view..

Capacity, health and performance for your whole fleet, at a glance.

All alerts. One place..

A degraded drive in any site shows up in one alerting surface.

No firewall setup.

Bring remote sites into Central without reconfiguring their firewalls.

Specifications

Manages	Every maxRAIDOne system, in any site — including those managing Grid and maxObject
Alerting	One alerting surface for every system
Works with	maxRAIDOne, on one node or many
At a glance	Capacity, health and performance across the fleet
Remote sites	Connect without reconfiguring site firewalls
Built for	Teams running storage in more than one site, rack or data center

From one system to many

Start with one maxRAIDOne node. Add nodes for high availability. Central keeps every system — flash and hard drives, in every site — in one view, with one place for alerts.
